

XDR Program Change Highlights

Version 3.2.12 [final build 7] (July 7th, 2017)

- Integration of XDR SDK components to allow XDR Adapter capture for virtual environments.
- Allow brightness/contrast adjustments to thumbnail color images to be preserved when placed on the XDR print form.
- Allow saved recovered images to keep the default regional date format.
- Allow the video interface to move with the main XDR screen when the Switch Monitor button is selected.
- Provide an option for using full graphic chrome buttons or the new flat blue buttons in XDR.
